

TROX AIR PURIFIER

YOU CAN BREATHE EASY!

THE SAFER SOLUTION AGAINST COVID-19.
FROM THE MARKET LEADER IN
VENTILATION TECHNOLOGY.

THE TROX AIR PURIFIER

THE SAFE STAND-ALONE SOLUTION TO
AEROSOLS CONTAMINATED BY VIRUSES

Aerosols contaminated by viruses are a major carrier of
Coronaviruses. With the TROX AIR PURIFIER, you reduce the risk
of transmission in insufficiently ventilated rooms to a minimum –
without any complex installations. Simply set up and switch on.

AIR PURIFYING OR FRESH AIR?
Which is best for managing virus-contaminated aerosols?

THE INDOOR AIR PROFESSIONALS
That's why you should choose TROX.

What you need to know before buying.

CALCULATE YOUR DEMAND

The calculator determines the required number of units so that sound pressure values in a room, requested in accordance with VDI, 2081 are observed. A room sound absorption of 8 dB is included in the calculation here.

In accordance with REHVA, we recommend a room air change rate of 2 to 5 1/h and an airflow of min. 30 m³/h per person in the room (optimally 40-50 m³/h).

In rooms with ceilings at a height of 4 m or more and in large rooms with low occupancy, dimensioning should be according to the airflow per person. Please give us a call for assistance!

AIR CLEANING – EFFICIENT, QUIET

AND SAFE.

Large quantities of clean air stream out of the unit above head height. Aerosols are diluted by the airflow and displaced down to floor level or into the filter. This creates an ideal air movement. TROX's two-stage, high-performance filter system filters over 99.95% of all airborne viruses – with low noise levels and high energy efficiency.
